As with all drugs, side effects may occur. In field studies, the most common side effects reported were signs of discomfort or nervousness, colic, and/or pawing. OSPHOS should not be used in pregnant or lactating mares, or mares intended for breeding. Use of OSPHOS in patients with conditions affecting renal function or mineral or electrolyte homeostasis is not recommended. Refer to the prescribing information for complete details or visit www.dechra-us.com or call 866.933.2472.

CAUTION: Federal law restricts this drug to use by or on the order of licensed veterinarian.

OSPHOS[®] (clodronate injection)

Bisphosphonate

Brief Summary (For Full Prescribing Information, see package

CAUTION: Federal (USA) law restricts this drug to use by or on the order of a licensed veterinarian.

DESCRIPTION: Clodronate disodium is a non-amino, chlorocontaining bisphosphonate. Chemically, clodronate disodium is (dichloromethylene) diphosphonic acid disodium salt and is manufactured from the tetrahydrate form.

INDICATION: For the control of clinical signs associated with

CONTRAINDICATIONS: Horses with hypersensitivity to clodronate disodium should not receive OSPHOS

WARNINGS: Do not use in horses intended for human consumption.

HUMAN WARNINGS: Not for human use. Keep this and all drugs out of the reach of children. Consult a physician in case of accidental human exposure.

PRECAUTIONS: As a class, bisphosphonates may be associated with gastrointestinal and renal toxicity. Sensitivity to drug associated adverse reactions varies with the individual patient. Renal and gastrointestinal adverse reactions may be associated with plasma concentrations of the drug. Bisphosphonates are excreted by the kidney; therefore, conditions causing renal impairment may increase plasma bisphosphonate concentrations resulting in an increased risk for adverse reactions. Concurrent administration of other potentially nephrotoxic drugs should be approached with caution and renal function should be montitored. Use of bisphosphonates in patients with conditions or diseases affecting renal function is not recommended. Administration of bisphosphonates has been associated with abdominal pain (colic), discomfort, and agitation in horses. Clinical signs usually occur shortly after drug administration and may be associated with alterations in intestinal motility. In horses treated with OSPHOS these clinical signs usually began within 2 hours of treatment. Horses should be monitored for at least 2 hours following administration of OSPHOS.

Bisphosphonates affect plasma concentrations of some minerals and electrolytes such as calcium, magnesium and potassium, immediately post-treatment, with effects lasting up to several hours. Caution should be used when administering bisphosphonates to horses with conditions affecting mineral or electrolyte homeostasis (e.g. hyperkalemic periodic paralysis,

The safe use of OSPHOS has not been evaluated in horses less than 4 years of age. The effect of bisphosphonates on the skeleton of growing horses has not been studied; however, bisphos-phonates inhibit osteoclast activity which impacts bone turnover and may affect bone growth.

Bisphosphonates should not be used in pregnant or lactating mares, or mares intended for breeding. The safe use of OSPHOS has not been evaluated in breeding horses or pregnant or lactating mares. Bisphosphonates are incorporated into the bone matrix, from where they are gradually released over periods of months to years. The extent of bisphosphonate incorporation into adult bone, and hence, the amount available for release back into the systemic circulation, is directly related to the total dose and duration of bisphosphonate use. Bisphosphonates have been shown to cause fetal developmental abnormalities in laboratory animals. The uptake of bisphosphonates into fetal bone may be greater than into maternal bone creating a possible risk for skeletal or other abnormalities in the fetus. Many drugs, including bisphosphonates, may be excreted in milk and may be absorbed by nursing animals.

Increased bone fragility has been observed in animals treated with bisphosphonates at high doses or for long periods of time. Bisphosphonates inhibit bone resorption and decrease bone turnover which may lead to an inability to repair micro damage within the bone. In humans, atypical femur fractures have been reported in patients on long term bisphosphonate therapy; how-ever, a causal relationship has not been established.

ADVFRSE REACTIONS: The most common adverse reactions reported in the field study were clinical signs of discomfort or nervousness, colic and/or pawing. Other signs reported were lip licking, yawning, head shaking, injection site swelling, and

IMPORTANT EQUINE HEALTH INFORMATION

Equestrian Sport Productions has had vaccination protocol in place since 2013. We will now adhere to GR845 in which:

At Federation licensed competitions horses, more than 7 months of age, entering the grounds must be accompanied by documentation of Equine Influenza Virus and Equine Herpes Virus (Rhinopneumonitis) vaccinations within six months prior to entering the stables. Horses not in compliance with this rule may be required to leave the competition grounds upon request by Competition Management. Documentation should consist of one of the following methods mentioned below. The frequency of vaccine administration should be per the vaccine manufacturers' or veterinarian's recommendations. It is recommended that vaccines are administered by or under the direction of a veterinarian.

- 2. In the case of vaccines administered by a veterinarian, the exhibitor, upon request by Competition Management, must provide documentation from the veterinarian on documenting that the horse in question received the vaccinations; name of the vaccines and date of vaccine administration.
- 3. In the case of vaccines administered by a person other than a veterinarian, the exhibitor, upon request by Competition Management, must provide a receipt of the vaccine purchase which is signed by the owner, or agent with care, custody, and control of the horse; name, serial number and expiration date of the vaccine; and date of vaccine administration.
- 4. In the case of a horse that is unable to receive either of the vaccinations due to a history of adverse reactions, the exhibitor, upon request by Competition Management, must provide a letter from the veterinarian on official letterhead stating that the horse in question cannot be vaccinated due to medical concerns and a log of temperatures taken twice daily for the seven days prior to entering the competition grounds.

These horses must also have their temperature taken and logged twice daily while on the competition grounds.

The log of temperatures should be provided to the Competition Management, steward, or technical delegate when requested.

- 5. A current negative coggins test. Please renew before it expires, and not just before it is necessary to leave the state. It is strongly recommended that all horses be vaccinated for Equine EHV-1 (either modified live or killed vaccine) no sooner than 7 days prior and no later than 180 days prior to entering the show grounds. Most EHV-1 vaccines are only considered effective for 180 days. Check with your veterinarian about which vaccine you use.
- 6. Once the horse leaves the facility you may be required to show a new Statement of Health upon your return to the facility. Current vaccination against WNV, EEE, WEE, Tetanus and Rabies is strongly recommended
- 7. You should be able to document your horses normal temperature before arrival. Please do not ship horses with elevated temperatures. It is recommended that you establish a log of temperatures taken at least twice daily. If there is an elevated temperature for more than a 24 hour period, please consult your local Veterinarian immediately.
- 8. Every effort should be made to minimize stress and commingling of horses shipped long distances. Extra hours on a horse van, or moving from stable to stable is the fastest way to compromise your horses' and your neighbors horses' health.
- 9. Any horse on the show grounds with a fever of unknown origin or of suspicious origin must be reported to ESP Management. It is always better to err on the side safety. Isolation stalls will either be available on the grounds or at a local veterinary practice if the need arises.
- 10. Please take the time to review equine good hygiene practices and impress its importance to your groom in everyday care.

6HOLIDAYO & OHORSES \$100,000 USEF U25 SHOW JUMPING NATIONAL CHAMPIONSHIP

Eligibility: USEF shall be responsible for determining applicants' eligibility to compete in the Championship. The Championship will be open to riders from the age of 16 up to and including 25 years of age in the calendar year (for 2018, riders born in the years 1993 - 2002). Riders may also compete on a different horse(s) in either the International Open Jumper division or in the Amateur Owner/Junior Jumper division if otherwise qualified. Riders competing in the Open Jumper division may not compete in the Amateur Owner/Junior Jumper division.

Qualifying: 40 US riders will be accepted. One horse per rider. The rider qualifies, not the horse/rider combination. Riders will be accepted based upon the following system:

- 40 US riders from the USEF U25 Rider Ranking List dated October 27, 2018
- If there are openings remaining, riders will be invited according to their U25 Rider Ranking List Entry Fee: \$2000 for this section. Individual classes may not be entered.

Format: To be run as a Championship with three competitions. Prize money will be awarded in each competition as well as for the overall results. The Champion will be determined as follows:

Point System: The winner of each of the first two Championship Competitions gets one point more than the number of starters in the first competition. The second placed gets two points less than the winner, the third placed three points less than the winner, and so on. In the first two Competitions points are given to all competitors having finished the initial round. Competitors who have been eliminated or have retired in the initial round of the first two Competitions do not get points, but may continue to compete. Points won by competitors who are tied are added up and divided equally. Fractions of .5 and more are rounded up; fractions of less than .5 are rounded down.

After the second Competition, points are transformed into penalties. The competitor with the highest number of points after two competitions will have O penalties. For all other competitors the number of penalties will be calculated by multiplying with the coefficient of 0.50 the difference between their number of points and the points of the leading rider after two Competitions. In this procedure all decimals are rounded down.

Final Overall Results: The overall winner will be the competitor with the lowest number of penalties after the three Championship Competitions. A competitor who qualifies for the second Competition but who does not start in that Competition cannot be ranked higher than competitors who started in both the first and second Championship Competitions.

If competitors are tied for first place after the three final Competitions, there will be a jump-off against the clock over a reduced course of at least six obstacles.

In case of equality of penalties and time in this jump-off a second jump-off, against the clock, will be held over the same course.

Competitors not in the jump-off but tying on penalties will be separated for the purpose of final overall result by their time in the second round of the third Championship Competition.

Order of Go: The order of go for the First Competition will be drawn. The order of go for the Second & Third Competitions will be in reverse order of merit from the overall standings.

Stabling: Horses are required to be on the showgrounds at least 24 hours prior to the first competition and must remain there until finished competing.

THE FEI CODE OF CONDUCT

FOR THE WELFARE OF THE HORSE

The Fédération Equestre Internationale (FEI) expects all those involved in international equestrian sport to adhere to the FEI's Code of Conduct and to acknowledge and accept that at all times the welfare of the horse must be paramount and must never be subordinated to competitive or commercial influences.

- At all stages during the preparation and training of competition horses, welfare must take precedence over all other demands. This includes good horse management, training methods, farriery and tack, and transportation.
- 2. Horses and competitors must be fit, competent and in good health before they are allowed to compete. This encompasses medication use, surgical procedures that threaten welfare or safety, pregnancy in mares and the misuse of aids.
- 3. Events must not prejudice horse welfare. This involves paying careful attention to the

- competition areas, ground surfaces, weather conditions, stabling, site safety and fitness of the horse for onward travel after the event.
- 4. Every effort must be made to ensure that horses receive proper attention after they have competed and that they are treated humanely when their competition careers are over. This covers proper veterinary care, competition injuries, euthanasia and retirement.
- The FEI urges all involved with the sport to attain the highest levels of education in their areas of expertise.

A full copy of this Code can be obtained from the Fédération Equestre Internationale, Avenue Mon-Repos 24, 1005 Lausanne, Switzerland.
Telephone: +41 21 310 47 47. The Code is available in English & French.

The Code is also available on the FEI's website: www.horsesport.org.

Go to http://www.aphis.usda.gov/vs/ncie.

USDA GUIDE SHEET FOR HORSES THAT REQUIRE A 7-DAY QUARANTINE COUNTRIES THAT REQUIRE A 7-DAY QUARANTINE

All countries in the Western Hemisphere except for: Canada, Mexico, Bermuda, British Virgin Islands. Horses may be imported into the United States provided they are accompanied by a proper veterinary health certificate issued by a full-time veterinary officer of the National Government stating that the horses have:

- Been in that country for 60 days immediately preceding importation. If the horses have not been in the country 60 days, they are to be accompanied by a like certificate issued by a full-time salaried veterinary officer of the national government of each country in which the horses have been during the 60 days immediately preceding shipment to the United States.
- 2. Been inspected and found free of contagious diseases and insofar as can be determined exposure thereto during the 60 days immediately preceding exportation.
- 3. Not been vaccinated with a live, attenuated, or inactivated vaccine during the 14 days immediately preceding exportation.
- 4. Not been on premises where African horse sickness, dourine, glanders, surra, epizootic lymphangitis, ulcerative lymphangitis, equine piroplasmosis, equine infectious anemia (EIA), contagious equine metritis (CEM), vesicular stomatitis, or Venezuelan equine encephalomyelitis (VEE) has occurred during the 60 days immediately preceding exportation, nor have these diseases occurred on any adjoining premises during this same period of time.
- Not been in a country where CEM is known to exist, nor have had any contact, breeding or otherwise, with horses from such a country, for the 12 months preceding exportation.

6. Been inspected and found to be free of ectoparasites. Horses presented for entry into the United States from countries that are not recognized by the USDA as being free from VEE or screwworm are required to be quarantined for a minimum of 7-days at the port of entry. Quarantine charges are \$270.00 per day for each horse for days 1 through 3, and \$195.00 for each horse for days 4 through 7 (prices subject to change without prior notice.) If the length of quarantine is extended beyond 7 days, the quarantine rate may be lowered. While in quarantine, tests for dourine, glanders, equine piroplasmosis, and EIA are conducted. Horses that test positive for any of the diseases will be refused entry into the U.S.
