You should hear the "THANKS"

THANKS to warm-hearted animals lovers throughout our area, the Foothills Humane Society can continue to fulfill its mission for Polk County, Landrum, Gowensville, and Campobello.

The government supports us with 16-18% of our yearly budget. The rest depends on the generosity of contributors and other caring folks like you who visit, listen to sad stories*, and adopt.

As a no-kill shelter, we house and feed, care and socialize hundreds of lost and discarded pets, waiting until that special person comes in and says, "Hi, let's go home." More than 1300 in 2015.

OUR MISSION

- Shelter and care for stray and surrendered companion animals in our community
- Prevent cruelty to animals
- Reunite lost animals and owners

- Adopt animals to qualified homes or place with reputable organizations
- Educate the public about responsible pet ownership and population control

* According to a USA TODAY® poll, a majority of pet owners says their dogs and cats "talk" to them. To help us and hear for yourself what's being said, stop in for a chat.

Proven efficacy*

**Quick and

Well tolerated*
in clinical trials

OSPPOS contains clodronate disodium, a bisphosphonate indicated for the control of clinical signs associated with navicular syndrome in horses. OSPPOS is the only FDA-approved bisphosphonate for use in horses that is labeled for intramuscular injection. In a clinical trial evaluating OSPPOS in 86 horses, lameness improved in 74.7% of horses by at least one grade 56 days after treatment. Only 9% of horses displayed clinical signs of being uncomfortable, nervous, colicky and or pawing after receiving OSPPOS. Less than 1% of horses experienced colic requiring treatment.

As with all drugs, side effects may occur. In field studies, the most common side effects reported were signs of discomfort or nervousness, colic, and/or pawing. OSPPOS should not be used in pregnant or lactating mares, or mares intended for breeding. Use of OSPPOS in patients with conditions affecting renal function or mineral or electrolyte homeostasis is not recommended. Refer to the prescribing information for complete details or visit www.dechra-us.com.

CAUTION: Federal law restricts this drug to use by or on the order of licensed veterinarian.

* Freedom of Information Summary, Original New Animal Drug Application, NADA 141-427, for OSPPOS. April 28, 2014.

OSPPOS[®]

(clodronate injection)

Bisphosphonate
For use in horses only.

Brief Summary (For Full Prescribing Information, see package insert)

CAUTION: Federal (USA) law restricts this drug to use by or on the order of a licensed veterinarian.

DESCRIPTION: Clodronate disodium is a non-amino, chloro-containing bisphosphonate. Chemically, clodronate disodium is (dichloromethylene) diphosphonic acid disodium salt and is manufactured from the tetrahydrate form.

INDICATION: For the control of clinical signs associated with navicular syndrome in horses.

CONTRAINDICATIONS: Horses with hypersensitivity to clodronate disodium should not receive OSPPOS.

WARNINGS: Do not use in horses intended for human consumption.

HUMAN WARNINGS: Not for human use. Keep this and all drugs out of the reach of children. Consult a physician in case of accidental human exposure.

PRECAUTIONS: As a class, bisphosphonates may be associated with gastrointestinal and renal toxicity. Sensitivity to drug associated adverse reactions varies with the individual patient. Renal and gastrointestinal adverse reactions may be associated with plasma concentrations of the drug. Bisphosphonates are excreted by the kidney; therefore, conditions causing renal impairment may increase plasma bisphosphonate concentrations resulting in an increased risk for adverse reactions. Concurrent administration of other potentially nephrotoxic drugs should be approached with caution and renal function should be monitored. Use of bisphosphonates in patients with conditions or diseases affecting renal function is not recommended. Administration of bisphosphonates has been associated with abdominal pain (colic), discomfort, and agitation in horses. Clinical signs usually occur shortly after drug administration and may be associated with alterations in intestinal motility. In horses treated with OSPPOS these clinical signs usually began within 2 hours of treatment. Horses should be monitored for at least 2 hours following administration of OSPPOS.

Bisphosphonates affect plasma concentrations of some minerals and electrolytes such as calcium, magnesium and potassium, immediately post-treatment, with effects lasting up to several hours. Caution should be used when administering bisphosphonates to horses with conditions affecting mineral or electrolyte homeostasis (e.g. hyperkalemic periodic paralysis, hypocalcemia, etc.).

The safe use of OSPPOS has not been evaluated in horses less than 4 years of age. The effect of bisphosphonates on the skeleton of growing horses has not been studied; however, bisphosphonates inhibit osteoclast activity which impacts bone turnover and may affect bone growth.

Bisphosphonates should not be used in pregnant or lactating mares, or mares intended for breeding. The safe use of OSPPOS has not been evaluated in breeding horses or pregnant or lactating mares. Bisphosphonates are incorporated into the bone matrix, from where they are gradually released over periods of months to years. The extent of bisphosphonate incorporation into adult bone, and hence, the amount available for release back into the systemic circulation, is directly related to the total dose and duration of bisphosphonate use. Bisphosphonates have been shown to cause fetal developmental abnormalities in laboratory animals. The uptake of bisphosphonates into fetal bone may be greater than into maternal bone creating a possible risk for skeletal or other abnormalities in the fetus. Many drugs, including bisphosphonates, may be excreted in milk and may be absorbed by nursing animals.

Increased bone fragility has been observed in animals treated with bisphosphonates at high doses or for long periods of time. Bisphosphonates inhibit bone resorption and decrease bone turnover which may lead to an inability to repair micro damage within the bone. In humans, atypical femur fractures have been reported in patients on long term bisphosphonate therapy; however, a causal relationship has not been established.

ADVERSE REACTIONS: The most common adverse reactions reported in the field study were clinical signs of discomfort or nervousness, colic and/or pawing. Other signs reported were lip licking, yawning, head shaking, injection site swelling, and hives/pruritus.

A NEW FLY MASK DESIGN. AND A NEW STANDARD.

When we decided to redesign the UltraShield® Fly Mask, we set the bar incredibly high. So we started by doing our homework. We asked horse owners what they did and didn't like about fly masks, and what their ideal mask would be. That research led us to the latest high-tech fabrics, advanced comfort-enhancing features, and new sizing options. All resulting in a newly designed mask that provides our ultimate protection against insects, the sun, and dirt and debris — while keeping horses cool, dry, and comfortable.

A BREAKTHROUGH DESIGN

We began with a new comfort-fit design, including two-way controlled stretch fabric on the crown and jowl,

extended fabric behind the ears, structured eye darts, and a strong double-locking hook and loop closure.

ADVANCED FABRICS

Just as important, we brought that innovative design to life using the latest high-tech performance

fabrics. That includes a crown and jowl made with a diamond-knit fabric used in running apparel that wicks away moisture. Ears crafted from a sport knit that's commonly used in football

jerseys and known for its soft feel and durability. And a face fashioned from a durable, breathable woven mesh that blocks 80% of harmful UV rays while also reducing heat transfer and solar glare. We've also made sure that those fabrics resist stains — all in a mask that comes in three sizes for optimal fit.

A NAME YOU CAN TRUST

Our redesigned fly mask is just the latest addition to a full line of our outstanding UltraShield® fly control products, and to the broader line of trusted Absorbine® brands. So when you're looking for the

best in horse care, look for the yellow ribbon.

Formal attire required. Starting order will be drawn. Horses must be on grounds 24 hours prior to the start of the class. A check in with the official USEF Steward is required.

FEI COMPETITORS IMPORTANT INFORMATION

Exhibitors are responsible for having their respective Federations declare their horses for the FEI competition BEFORE the close of entries as listed on the FEI Draft Schedules for each week. This Federation weekly declaration is the automatic nomination into the #9999 Jog Class. The athlete must manually withdraw any horse they do not plan to show before the #9999 jog order is posted to avoid paying the late withdrawal fee. Proper entries and withdrawals in the Jog Class before the posted order is the sole responsibility of the athlete.

The horse show office will determine the entries for each and every FEI week in the Jog Class based solely off of the Definite Entries submitted on the FEI Entry System for that week. We will allow substitutions made by Federations up until the time of the jog/horse inspection.

Please be sure to notify the stable office each week BEFORE the jog/horse inspection/stabling time to secure your stall location. ALL horses living in FEI Stabling, whether they are competing or not, must obey FEI rules. All horses must be in FEI stabling no later than Tuesday 12:30 pm of each week.

The jog/horse inspection will take place on Tuesday at 1:00 pm of each week in the FEI area. Any change to the FEI jog/horse inspection will be posted in the FEI area and the Horse Show Office. Both horse and rider must be current FEI members in order to present at the jog/horse inspection.

Credentials are REQUIRED for entrance to the FEI Compound at all times. Credentials are signed out from the FEI Office in the FEI Compound. Five passes will be issued per horse: Rider (1), Trainer of record signing the entry blank (1), Groom (1), and Owner of record in the passport (2).

Declarations for individual classes must be done in the Horse Show Office each week on an official Add/Scratch Sheet. All class declarations must be made by 4:00pm the day before the class is held, unless otherwise specified. Declarations made after that time may be accepted by Management only and, IF accepted, will result in that horse going first in the competition in question draw.
