# HIGH - PERFORMANCE SUPPORT FOR HARDWORKING HORSES.

Whether they're involved in competition or intense training, some horses just work harder than others. They're the reason we created new Bute-Less® Performance Comfort & Recovery Support. These advanced pellets use an optimum blend of natural ingredients proven to provide comprehensive support for managing the occasional stiffness, soreness, and discomfort that's associated with training and competition.\*

### OPTIMIZED CURCUMIN

When we were developing Bute-Less® Performance, we knew that we wanted to feature curcumin, a powerful, natural antioxidant that's found in the spice turmeric. But we didn't want to use just any curcumin. We chose

Longvida®, a breakthrough formula developed by Verdure Sciences and UCLA neuroscientists. Clinical data consistent with human bioavailability showed that Longvida® is at least 65 times more bioavailable than unformulated curcumin.\*\*

**SHOW-SAFE FORMULA**

### READY TO COMPETE

Beyond curcumin, Bute-Less® Performance utilizes a range of other powerful active ingredients, including Boswellia, Yucca, and MSM. All to provide outstanding performance support. And since it doesn't contain any substances currently prohibited by USEF or FEI, it's show-safe. Of course, Bute-Less® is just one of the Absorbine® brands horse owners trust. So if you're looking for the best in horse care, just look for the yellow ribbon.

Optimum blend of natural ingredients to enhance the body's normal repair of connective tissue and joints

Protection against free radical damage

Support for GI tract health while guarding against gastric distress

Support for muscle recovery

Helps decrease normal inflammatory pathways

As with all drugs, side effects may occur. In field studies, the most common side effects reported were signs of discomfort or nervousness, colic, and/or pawing. OSPHOS should not be used in pregnant or lactating mares, or mares intended for breeding. Use of OSPHOS in patients with conditions affecting renal function or mineral or electrolyte homeostasis is not recommended. Refer to the prescribing information for complete details or visit [www.dechra-us.com](http://www.dechra-us.com) or call 866.933.2472.

CAUTION: Federal law restricts this drug to use by or on the order of licensed veterinarian.

## OSPHOS<sup>®</sup> (clodronate injection)

Bisphosphonate  
For use in horses only.

Brief Summary (For Full Prescribing Information, see package insert)

CAUTION: Federal (USA) law restricts this drug to use by or on the order of a licensed veterinarian.

DESCRIPTION: Clodronate disodium is a non-amino, chloro-containing bisphosphonate. Chemically, clodronate disodium is (dichloromethylene) diphosphonic acid disodium salt and is manufactured from the tetrahydrate form.

INDICATION: For the control of clinical signs associated with navicular syndrome in horses.

CONTRAINDICATIONS: Horses with hypersensitivity to clodronate disodium should not receive OSPHOS.

WARNINGS: Do not use in horses intended for human consumption.

HUMAN WARNINGS: Not for human use. Keep this and all drugs out of the reach of children. Consult a physician in case of accidental human exposure.

PRECAUTIONS: As a class, bisphosphonates may be associated with gastrointestinal and renal toxicity. Sensitivity to drug associated adverse reactions varies with the individual patient. Renal and gastrointestinal adverse reactions may be associated with plasma concentrations of the drug. Bisphosphonates are excreted by the kidney; therefore, conditions causing renal impairment may increase plasma bisphosphonate concentrations resulting in an increased risk for adverse reactions. Concurrent administration of other potentially nephrotoxic drugs should be approached with caution and renal function should be monitored. Use of bisphosphonates in patients with conditions or diseases affecting renal function is not recommended. Administration of bisphosphonates has been associated with abdominal pain (colic), discomfort, and agitation in horses. Clinical signs usually occur shortly after drug administration and may be associated with alterations in intestinal motility. In horses treated with OSPHOS these clinical signs usually began within 2 hours of treatment. Horses should be monitored for at least 2 hours following administration of OSPHOS.

Bisphosphonates affect plasma concentrations of some minerals and electrolytes such as calcium, magnesium and potassium, immediately post-treatment, with effects lasting up to several hours. Caution should be used when administering bisphosphonates to horses with conditions affecting mineral or electrolyte homeostasis (e.g. hyperkalemic periodic paralysis, hypocalcemia, etc.).

The safe use of OSPHOS has not been evaluated in horses less than 4 years of age. The effect of bisphosphonates on the skeleton of growing horses has not been studied; however, bisphosphonates inhibit osteoclast activity which impacts bone turnover and may affect bone growth.

Bisphosphonates should not be used in pregnant or lactating mares, or mares intended for breeding. The safe use of OSPHOS has not been evaluated in breeding horses or pregnant or lactating mares. Bisphosphonates are incorporated into the bone matrix, from where they are gradually released over periods of months to years. The extent of bisphosphonate incorporation into adult bone, and hence, the amount available for release back into the systemic circulation, is directly related to the total dose and duration of bisphosphonate use. Bisphosphonates have been shown to cause fetal developmental abnormalities in laboratory animals. The uptake of bisphosphonates into fetal bone may be greater than into maternal bone creating a possible risk for skeletal or other abnormalities in the fetus. Many drugs, including bisphosphonates, may be excreted in milk and may be absorbed by nursing animals.

Increased bone fragility has been observed in animals treated with bisphosphonates at high doses or for long periods of time. Bisphosphonates inhibit bone resorption and decrease bone turnover which may lead to an inability to repair micro damage within the bone. In humans, atypical femur fractures have been reported in patients on long term bisphosphonate therapy; however, a causal relationship has not been established.

ADVERSE REACTIONS: The most common adverse reactions reported in the field study were clinical signs of discomfort or nervousness, colic and/or pawing. Other signs reported were lip licking, yawning, head shaking, injection site swelling, and hives/pruritus.

## FEI COMPETITORS - IMPORTANT INFORMATION

**Exhibitors are responsible** for having their Federations declare their horses for the FEI competition BEFORE the close of entries as listed in the FEI Definite Schedules each week. This Federation weekly declaration is the automatic nomination into the Jog. The athlete must manually withdraw any horse he/she does not plan to show before the jog order is posted to avoid paying the late withdrawal fee as indicated in the FEI Draft Schedule. Proper entries and withdrawals in the Jog before the posted order is the sole responsibility of the athlete.

**The Horse Show Office** will determine the entries for each and every FEI week in the Jog based solely off of the Definite Entries submitted on the FEI Entry System for that week. We will allow substitution made by Federations up until 1 hour prior to the Jog/Horse Inspection.

**Class Declarations** must be done in the Horse Show Office each week on an official Add/Scratch sheet. All class declarations must be made no later than 4:30PM the day before the class is held, unless otherwise noted. Declarations made after that time may be accepted by Management only and, if accepted, will result in that horse going first in the competition in question draw.

**Please Notify the Stable Office** each week BEFORE the Jog/Horse Inspection/stabline time to secure your stall location.

**Stables are open** to FEI horses on Tuesday 9:00AM. All horses must be in FEI stabling no later than Tuesday 12:30PM each week. All horses living in FEI stabling, whether showing or not, must obey all FEI Rules.

**The Jog/Horse Inspection will take place** on Tuesday at 1:00PM of each week in the FEI area. Any change to the FEI Jog/Horse Inspection will be posted in the FEI area and the Horse Show Office. Both horse and rider must be current FEI members in order to present at the Jog/Horse Inspection.

**Credentials are required** for entrance to the FEI Compound at all times. Credentials are signed out by the FEI Office in the FEI Compound. Five passes will be issued per horse: Rider (1), Trainer of record signing the entry blank (1), Groom (1), and Owner of record as listed in the passport (2).

**The FEI Definite Schedule supersedes any information regarding FEI classes/competitions that is printed in this prize list.**
